

Acknowledgements

This book covers much ground—chronologically, thematically, and geographically. It is based on research and scholarship on topics ranging from nineteenth-century French fashion to late-twentieth-century Greek computer hackers. To be able to paint a broad picture of how Europe was crafted from below, we have relied on the expertise of a large number of scholars. Colleagues from an array of countries and language areas have kindly shared their knowledge with us. Some have read and commented on earlier versions or the ensuing chapters; others have provided the authors firsthand with papers and articles, presenting empirical material previously unavailable in the languages in which the authors themselves are fluent. Although the bibliography at the end of the volume might imply an English bias, this does not mean that the underlying scholarship focuses on the Anglo-Saxon world only. We have sought out early career scholars from various parts of Europe who have kindly provided translations and summaries of their original research. In fact, we have brought together many scholars from non-English based research communities through workshops, special issues, and collections of essays that form the backbone of *Consumers, Tinkerers, Rebels*. Furthermore, archivists, librarians, and student assistants have provided material in various ways.

The collegial knowledge exchange has to a large degree taken place at conferences and workshops. Several foundations and institutions have generously contributed to financing the organization of and the trips to such events. In addition, research councils have supported some of the research on which the book is based. Below, the authors list the collective bodies and individuals without whom this book could never have materialized. Hopefully, the list is all-encompassing; in case the authors have forgotten anyone, please accept their sincere apologies.

In the first instance we would like to thank eight colleagues who supplied original papers of direct relevance to the book: Adri A. de la Bruhèze, Marija Drémaité, Theodore Lekkas, Faidra Papanelopoulou, Emanuela Scarpellini, Karin Taylor, Milena Veenis, and Patryk Wasiak. They and others provided the authors with extensive advice and invaluable references on various topics, and in some cases generally shared unpublished material: Gerard Alberts, Irene Anastasiadou, Esther Anaya, Adri A. de la Bruhèze, Alexander Badenoch, Dagmar Bellmann, Simon Bihl, Robert Bud, Marie-Emanuelle Chessel, Peter Cox, Katarzyna Cwierka, Pascal Delhey, Martin Emanuel, Els De Vos, Valentina Fava, Terje Finstad, Martin Franc, Santiago Gorostiza, Ferenc Hammer, Larissa Iakovleva-Zakharova, Dagmara Jajeśniak-Quast, Jíra Janáč, Thomas Kaiserfeld, Stijn Knuts, Dick van Lente, Aleksandra Lipińska, Elena Kochetkova, Martin Kohlraush, Sławomir Lotysz, Gerrit van Maanen, Malgorzata Mazurek, Massimo Maraglio, Nina Möllers, Dobrinka Parusheva, Faidra Papanelopoulou, Enrique Perdiguero-Gil, Marcus Popplow, Martin Schiefelbusch, Frank Schipper, Emanuela Scarpellini, Luisa Sousa, Elitsa Stoilova, Laurant Tissot, Aristotle Tympas, Richard Vahrenkamp, Frank Veraart, Erik van der Vleuten, Margaret Walsh, Heike Weber, Andrea Westermann, and Len Winkelman.

Whereas Johan Schot, Philip Scranton, Andreas Ludwig, Annemarie de Wildt, and two anonymous reviewers commented on the entire manuscript, the following persons have read and criticized individual chapters: Gerard Alberts, Alexander Badenoch, Liesbeth Bervoets, Eileen Boris, Carolien Bouw, Marija Drémaité, Caroline van Dullemen, Martin Emanuel, Nicoletta Emmens, Rosa Knorringa, Hester Lenstra, Jan-Hendrik Meyer, Thomas J. Misa, Emanuela Scarpellini, Nathalie Scholz, Sonja Petersen, Milena Veenis, and Frederike de Vlaming. The authors are extremely grateful for their comments, as well for the invaluable and

unflagging assistance that Lisa Friedman provided first and Phil Scranton toward the end of the editing process.

At the early, conceptual stage, Heinz-Gerhard Haupt, Thomas J. Misa, Kiran Patel, Pierre-Yves Saunier, and Frank Trentmann gave us important hints in which direction to go and how to design the manuscript. At later stages the authors of the other volumes in the *Making Europe* series, as well as the participants at several series workshops, contributed with immensely valuable comments and criticism. Throughout the process the members of the ESF-financed project “European Ways of Life in the American Century” (EUWOL) inspired the authors in various ways, especially when conceiving chapters 2, 4, and 5.

Of the archivists and librarians who assisted the authors, special thanks go to Cristina Cuevas-Wolf (Wende Museum, California), Monique de Hair (ANWB archives, The Hague) and Eva Hammerschmiedová (Organisation intergouvernementale pour les transports internationaux ferroviaires, Berne), Madelief Hohé (Gemeentemuseum Den Haag), Berthe Receveur (Sporwegmuseum Utrecht), Roelof Jansma (Universiteit van Amsterdam), Erwin Nolet and Dindy van Maanen (both at the Netherlands Institute of Advanced Studies), and Arlette Strijland (Aletta E-Quality, Amsterdam). Equally important was the research assistance of Ana Bara, Giel van Hooff, Slawomir Lotysz, João Machado, Faidra Papanelopoulou, Marcela Rilovic, and Marie-Christin Wedel. And of immense importance to the design of the book were the image assistants Giel van Hooff, Slawomir Lotysz, Katherine Kay-Mouat, and Jan Korsten as well as the research team of the Inventing Europe, European Digital Museum for Science & Technology <http://www.inventingeurope.eu/>.

We express special thanks to the co-editors of special journal issues and edited books of direct importance to the volume:

- Liesbeth Bervoets and Mikael Hård, eds., “Coping with Modernity: European Ways of Housing in the American Century,” Special Issue of *Home Cultures* 7, no. 2 (July 2010) [incl. case studies from Belgium, Bulgaria, Czechoslovakia, the Netherlands, and Sweden]
- Adri A. de la Bruhèze and Ruth Oldenziel, eds., Special Section on Global Cycling, *Transfers* 2, no. 2 (Summer 2012) [incl. case studies from Finland, West Africa, China, and Japan]

- Adri A. de la Bruhèze and Martin Emanuel, eds., “European Bicycling: The Politics of Low and High Culture: Taming and Framing Cycling in Twentieth-Century Europe,” *Journal of Transport History* 33, no. 1 (June 2012) [incl. case studies from the Netherlands, Germany, Sweden, and Finland]
- Heike Weber and Ruth Oldenziel, eds., “Recycling and Reuse in the Twentieth Century,” Special Issue *Contemporary European History* 22, no. 3 (2013) [incl. case studies from Germany, France, the Netherlands, and Sweden]
- Gerard Alberts and Ruth Oldenziel, eds., *Hacking Europe. From Computer Culture to Demoscenes* (New York: Springer Verlag, 2013) [incl. case studies from Great Britain, Czech Republic, Finland, Germany, Greece, the Netherlands, Poland, and Yugoslavia]
- Ruth Oldenziel and Helmuth Trischler, eds., *Re/cycling Histories: Paths towards Sustainability* [Oxford: Berghahn, forthcoming] [incl. case studies from Great Britain, France, Germany, Hungary, Japan, the Netherlands, Spain, and the United States]

In addition to these named individuals we would like to thank the participants of innumerable workshops and conferences, especially those that have been part of “Tensions of Europe,” an international network of historians of technology. The most important conferences were organized in Sofia, Amsterdam, Lisbon, and Copenhagen. In addition to several meetings and workshops held within the framework of the EUWOL project, the following events deserve a mention: “Re/Cycling History: Paths towards Sustainability,” Rachel Carson Center for Environment and Society (RCC), Munich, and “Towards a European Society? Transgressing Disciplinary Boundaries in European Studies Research,” Centre for European and International Studies Research (CEISR), Portsmouth; “The European: An Invention at the Interface of Technology and Consumption,” Munich Center for the History of Science and Technology, Munich, Germany.

We also wish to express our gratitude to the organizations that contributed financially to making this book possible: the European Science Foundation (ESF), the Foundation for the History of Technology (SHT), the Dutch National Science Foundation (NWO), the Netherlands Institute of Advanced Studies (NIAS), Darmstadt University of Technology, and the Technical University Eindhoven.

Finally, two persons deserve a special mention: Johan Schot—the

visionary without whom this book and indeed the whole *Making Europe* series would never have come about—and Phil Scranton, who never gave up encouraging the authors to continue with their work. You seldom find more enthusiastic and inspiring series editors.

*Ruth Oldenziel and Mikael Hård
Amsterdam and Darmstadt, March 2013*
